- MathComp is a mathematics competition held annually. The goal of the competition is to stimulate school children's interest in mathematics and to enhance their skills in problem solving.
- MathFun is another part of the event to further promote students' interest in mathematics and problem solving. Instead of taking test in a classroom setting, students are provided with lots of interesting mathematics puzzles and games to broaden their critical thinking skills and also to bring mathematical applications to life. For solving the problems, students are rewarded with fun gadgets and toys.
- While students are taking the written test, parents can attend a free parenting seminar organized by CIE. The seminar is intended to be informative and educational for the parents.

Schedule

Time	MathComp	MathFun	Parents
